15TH ANNUAL SYMPOSIUM

Saturday, February 24, 2018

The Collaboration for Early Childhood is delighted to present its 15th annual Symposium. This professional gathering provides an opportunity for anyone who works with young children – educators, caregivers, and parents – to gain knowledge, perspective, practical skills and tools for supporting all young children.

This year's theme is **Growing Together**. The 2018 Symposium is focused on "Growth Mindset" – the underlying beliefs people have about learning and intelligence.

We will discuss nurturing "Growth Mindset" in children, families, and co-workers, and being open to continuous growth as an educator. Workshops will cover topics such as brain development, social emotional teaching and learning, empowering young children, cultivating empathy, and more. We are confident you'll walk away with many new ideas and activities to try on Monday morning.

Please join us at Percy Julian Middle School on **Saturday, February 24, 2018**. The day will include early bird workshops, continental breakfast, a keynote address, lunch, and a variety of morning and afternoon breakout sessions led by noteworthy presenters. Participants will also have the opportunity to network, collect resources, and explore books.

We hope to see you in February!

"In a 'Growth Mindset,' people believe that their most basic abilities can be developed through dedication and hard work - brains and talent are just the starting point. This view creates a love of learning and a resilience that is essential for great accomplishments." Carol Dweck

Symposium Registration Fees

For Online Registration
and Payment:

collab4kids.org/Symposium

Scholarships available: Visit collab4kids.org/Symposium for more information and to access the application form.

\$40 Attendee Registration Fee,
postmarked, or paid online,
by February 9, 2018

\$40

**\$25 Full-Time Student
Registration Fee**

(valid/current ID must be
presented at check-in),
postmarked, or paid online,
by February 9, 2018

\$25

\$50 Registration Fee for ALL
individuals registering **after**
February 9, 2018, on-site or online.

Workshops

Early Bird A Read, Play, Love

This workshop will be divided into three distinct parts: Read, Play, and Love. Each part will include neuroscience, evidence-based research, and readings from developmentally appropriate books. Participants will learn and discuss how to support reading and playing in early learning. *Chris Rodda*

Early Bird B Playful Learning: Playing to Learn with Loose Parts

Play is important for all of us! Supporting and engaging children and parents in playful experiences can have a profound impact on development and learning. Join us for an interactive session that will focus on teaching STEM with loose parts. Participants will discover ways to select and arrange materials in ways that stimulate critical thinking and curiosity.

Alix Tonsgard and Chris Barry

Early Bird C Growing Interest in Understanding: The Impact of the Project Approach on Young Minds

This session will focus on child neurological development and the impact of the Project Approach to curriculum and environments. *Amelia Troutman*

Early Bird D Social-Emotional Teaching and Learning: Connecting Adult Practices to Child Competencies

This session will focus on equipping adults with strategies and tools to cultivate children's social-emotional skills through their everyday interactions. *Kate Zinsser, Callie Silver, and Xue Jiang*

Early Bird E Bringing the Outside IN: Engaging Young Minds through Natural Materials

This session will focus on providing new ways to engage young minds, while using nature and art. Learn about the difference between process and product art, and using open ended questions to spark child curiosity. *Cori O'Connell and Liz Hilt*

Early Bird F Using Materials as Provocations in a Reggio Inspired Classroom

In this workshop, you will learn about how a Growth Mindset can be fostered through Reggio-Inspired principles that promote cooperation and support exploration, discovery, and creativity. We will also investigate the role of the teacher, materials, documentation, and environment as they relate to the encouragement of a growth mindset within the context of ongoing relationships. *Bernadette Loyola*

Early Bird G Spanish Literacy in a Bilingual Preschool: Growing Bilingual Minds

This workshop examines how teaching language is different in a Spanish bilingual preschool classroom, and demonstrates best practices for Spanish language development and the growth of bilingual minds. *Samina Hadi-Tabassum*

Early Bird H Brain Development – Supports and Challenges for Growth Mindset

Brain development is made up of spurts, plateaus, connections, and pruning. We'll explore crucial windows to development and discuss supports and challenges to encourage resilient children with growth mindsets. *Susan Gittings*

Early Bird I Getting a Hold of Yourself: Body and Self-Compassion as Tools for Growth

Using both your body as the power tool it is and self-compassion, you will be able to create, emit, and grow the energy you want from yourself and others. *Sheryl Stoller*

Early Bird J & **AM K** Let's Get Critical: Developing Critical Thinking Skills in Early Childhood

Using music, movement, and play, you will learn strategies to promote executive function and critical thinking development in early childhood. Activities for problem-solving, decision-making, impulse control, organizing, leadership, and teamwork will be discussed. Learn unique strategies to make critical thinking fun and functional for early childhood learners! *Alyssa Wilkins*

AM L The Importance of Early Mathematics

Explore the importance of early math in early childhood through the Math at Home professional development website, the Early Math Matters project, and engagement in a math manipulative activity. *Anne Pradzinski & David Banzer*

AM M Teacher Triggers: How Does Our Behavior Impact Our Students?

This workshop will focus on challenging behaviors that trigger children in early childhood such as transitions, negative tones, and addressing the consequences of the behavior. We will also focus on sharing strategies that will support teachers in managing challenging behavior. *Vincent Rodriguez*

AM N Powerhouse Positive Guidance: Nurturing and Empowering Toddlers through the Ups and Downs

Revitalize behavior guidance with research-based strategies to equip the most rambunctious, challenging, sensitive, and vulnerable toddlers with competence skills for behavior, learning, and relationship success. *Marie Masterson*

AM O Anti-Racist Pedagogy and Our Own Racial-Identity Development

Understanding young children's AND our own racial identity development is critical to building antiracist whole classrooms. Let's end "colormutenes" to ask the hard questions and discuss race in community. *Sarah E. Dennis*

AM P What's Culture Got to Do with It? Understanding How Culture Impacts Learning

Children in various cultures learn different rules for communicating with adults through facial expressions, body language, physical gestures and much more. Learn how cultural differences can play out in the growth and development of children in your classroom and how this interaction can impact growth mindset. *Angela Searcy*

AM Q & PM R Sow the Seeds for Grit for a Growth Mindset in Preschoolers

A growth mindset is learned, and early childhood is the ideal learning time! Explore exciting research regarding lower-income students' achievement. Role-play curriculum ideas for teaching "grit," or persistence plus passion.

Janis Clark Johnston

AM S & PM T Intentional Environments for Purposeful Play

An intentionally planned classroom environment encourages children to approach materials with purpose. Learn strategies for selecting and presenting materials that foster children's problem solving, self-regulation, and social skills.

Michelle Patt

AM U & PM V Planting Seeds of Kindness: Empathy and the Growth Mindset

This workshop explores the correlation between practicing kindness and the development of growth mindset. Learn approaches and methods of communication with children to promote inspiration, self-regulation, and empathy in the classroom. *Gingi Lahera and Rita Cassiano*

AM W & PM X Science of a Developing Brain

What leads to healthy brain development? Our experiences and our interactions with our environment have a significant impact on how our predispositions are expressed. In this workshop, you'll explore how the brain develops, the importance of early experiences and how these experiences affect the developing brain. Come learn the science of early brain development – what nurtures it, what hinders it, and why. *Bilge Cerezci*

AM Y & PM Z Developing Our Curious Minds: A Focus on Math and Science

This workshop examines the importance of growing our own curious minds as adult learners in our work about and with young children, especially in relation to math and science. Learn why curiosity matters for math and science in early childhood and beyond.

Laura Grandau and Lauren Solarski

AM AA It's Not Just About Milestones! A Look at Infant/Toddler Development through the Power of Relationships (Part A)

This workshop goes beyond crawling, sitting, and babbling. You will explore the incredible power of relationships and interactions as the first fundamental building block of development. *Linda Horwitz and Nat Vikitsreth*

PM AB It's Not Just About Milestones! A Look at Infant/Toddler Development through the Power of Relationships (Part B)

Learn how to support infant/toddler development through supporting caregivers. This workshop includes a brief overview of how Fussy Baby Network uses the FAN relationship model of support and we will review a case study with examples in different settings.

Linda Horwitz and Nat Vikitsreth

You do not need to sign up for both AM AA and PM AB, as they are stand alone workshops. However, you can attend both workshops for a deeper dive into the topic.

PM AC Increasing Our Awareness: Culture, Bias, and the Body

The awareness of our relationship with culture, race, and bias is an essential component of effectively navigating the world around us. Learn an embodied approach to multicultural competence through lecture, discussion, and experiences, and explore the personal and interpersonal impacts of microaggressions and trauma. *Kyla Gilmore and Aisha Bell*

PM AD Children's Literature: Supporting a Growth Mindset and Young Children's Language Development

Children's literature provides a perfect venue for supporting young children's development of a growth mindset and their language development, which is a primary predictor for academic achievement. This hands-on session will include strategies to support growth mindset and language development in early childhood. *Sarah E. Dennis*

PM AE Why Won't They Sit Still At Circle Time?

We've all found ourselves at the front of a circle time not knowing what to do because of what we perceive as out-of-bounds behavior: hitting, short attention span, high activity levels and more. These behaviors that are looked at as negative focuses on the child as the problem. This session will help educators analyze the environmental, cognitive, and contextual factors that contribute to challenging behavior and to learn something new about themselves, their own learning, and their own behavior. *Angela Searcy*

Select your workshops when you register online.

The numbers are limited for each workshop so the general rule is first come, first served!
